

KarmaCheck for contingent workforce solutions

Your technology partner for modern screening and credentialing

You can't miss worker start dates or shortcut contract requirements due to outdated, manual background check and credentialing processes. Thankfully, new technology enables you to find a better balance between trust and safety, while also providing fast, efficient, transparent, and cost-effective service.

With KarmaCheck's centralized background check platform, you can develop standardized, systematic, and streamlined processes for all screening activities — across all clients and suppliers.

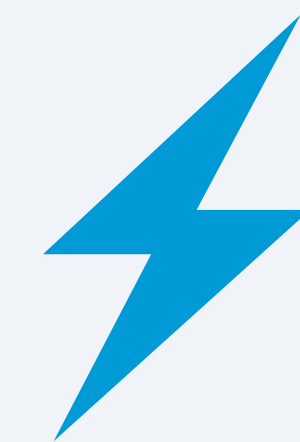

The KarmaCheck difference for MSP, VMS, and Direct Sourcing partners

Our contingent workforce screening solution combines technology with credentialing experts, enabling you to take advantage of:

- **Mitigated risk options:** Easily implement a solution where only candidates that pass screening requirements can start assignments. This drastically reduces risk associated with screening compliance and after-assignment audits.
- **Deep integrations:** With hundreds of integration points, our open API can connect with your VMS and homegrown systems. Integrating with KarmaCheck streamlines orders and syncs reports, making the verification process up to 3.5 times faster while reducing delays and ensuring timely screenings.
- **Automated communication and coordination:** KarmaCheck provides real-time updates to keep MSPs, clients, suppliers, and candidates informed on the status of screening activities. No email or phone call follow-ups required.
- **Added revenue:** Our revenue-share and referral programs reward you for giving your clients and candidates the best credentialing experience on the market. You can offer a rebate to your customer or help offset your company's costs.
- **Concierge-style support:** Our U.S.-based team of dedicated credentialing and research experts are available in real-time by chat, email, and phone, providing responses within minutes.

With KarmaCheck, you'll experience:

3.5x faster

turnaround times on standard checks compared to the competition.

71.2 NPS

demonstrates our commitment to creating exceptional customer experiences.

KarmaCheck: One platform that changes everything

Through **KarmaCheck's Strategic Partnership program**, you can unlock benefits only possible with a technology-first partner backed by screening experts. You'll gain a competitive advantage with:
